

SUBMITTED TO: Chairman Siersema and Members of the Commission

SUBMITTED BY: Travis K. Hopkins, PE, Director of Public Works

DATE: April 21, 2010

SUBJECT: Water Quality Report Update – Commercial/Industrial Inspection Program Requirements

As part of the permit, each permittee is required to conduct inspections of commercial and industrial facilities within their jurisdiction. The frequency of inspections is determined upon the priority of the facility, (high, medium or low threat to water quality), high priorities sites are inspected at least once a year, medium priorities sites are inspected at least once every two years and low priority sites are inspected at least once per permit cycle.

Staff will provide an overview of the inspection process at the Public Works Commission meeting to give Commissioners a basic understanding of what constitutes an NPDES violation.
